

# WELL DIVERSIFIED

During 1H 2026, the Company maintained a **well-diversified trading profile** across both geography and cargo mix. The fleet operated in multiple key regions, including Europe, the Mediterranean, the Middle East, Asia, South & North Atlantic and transatlantic routes, limiting exposure to regional market volatility.

Cargo employment was spread across a **broad range of dry products**, with no single commodity or customer dominating fleet utilization. This balanced approach supported stable earnings, high utilization, and effective risk management.

## GEOGRAPHIC DIVERSIFICATION | 1H 2026 DISCHARGE OPERATION

Indian Ocean

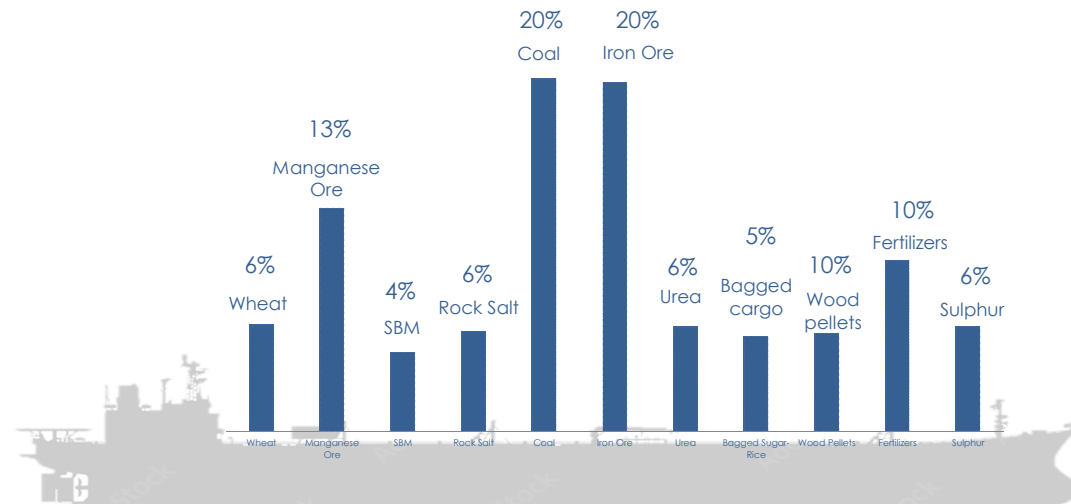

South Atlantic Ocean

North Atlantic Ocean

South Pacific Ocean

Baltic Sea
